

George Eastman's idea for getting the photographic process out to the general population was "you push the button, we do the rest." 120 years later, after struggling through the time where digital photography meant becoming an expert in the field, we have come full circle. We are now offering classes that are designed to allow beginning digital photographers to feel comfortable with taking electronic pictures. Whether you have your first digital camera or are considering one, this course is for you.

COURSE DATES

Wednesday, August 11 & 18

Monday, October 4 & 11

Tuesday, November 2 & 9

6 - 8 PM

\$50 for the two-session course

About the Course

This two-session course has been specially designed for newcomers in the digital world to help understand your camera, as well as taking and using digital pictures.

You will be learning about the basics of the camera, what buttons perform what functions, and what to do with your pictures once you have taken them. We will be talking about how pixels capture light and what happens to the image once it has been processed into your camera. You will also learn about similarities and differences between the film and digital world. Our hope is that you will come away from this course with a better understanding of the entire digital process.

Who Should Attend

Anyone who is just beginning digital photography and wants to get a better understanding of what they are doing, or anyone who has been involved in digital photography and just wants a refresher course of the basics.

What to Expect

- An overview of the basic functions and features of digital cameras.
- Live view menu demonstrations.
- Discussion on composition and taking pictures.
- How to safely organize and archive your images for future use and future generations.
- How to enhance your pictures to get the best quality for their intended purpose.

About the Instructor

Stephen Fogle is a professional photographer primarily involved in portraiture, event and nature photography. He has over 40 years experience in both film and digital photography. Having begun working with digital graphics in the late 1980's, he has followed the advancements of electronic imaging since it's early days. In 1996 Stephen accepted a position with PCA International as Divisional Trainer where he taught studio portraiture in studios across the country. He currently manages the camera department at Photo Images, where he has been working since 2003.
